

Math-0-Codo

Introduction

Are you a programming geek and a Mathematics lover? Do you see everything as a number and have passion to unlock mysteries? Come test your skills and compete with comrades.

Problem Statement

The problem will be based on Mathematical Expressions and Coding-Decoding of Secret Messages.

Rules

1. Event consists of 2 levels.
2. A team can consist of atmost 2 members.
3. Participation could be from any college.*However,Non- Academic students are also welcome to participate.*
4. Winners will be decided on the basis of *Accuracy,Consistency and Efficiency.*
5. In case of tie,time will be the deciding factor.

Gameplay

There will be 2 rounds-

1. **Math-ATTACK!!!** -*evaluating expression into code*
2. **Secret-Code** - *unlock the mystery*

In the first round,students have to deal with different **Mathematical problems**,analyze them and design the code accordingly. In second round , a

secret code will be provided in which firstly students have to decode it properly and then write a generalised code for it.
